

VULNERABILITY MANAGEMENT CENTER SERVICES BRIEF

Turn Findings Into Action. Reduce Risk. Strengthen Resilience.

SPECIALIZED **S|3** SECURITY SERVICES

VULNERABILITY MANAGEMENT SERVICES

Remediate Faster. Reduce Risk. Strengthen Resilience.

Scans and penetration tests reveal critical risks. But resolving them across teams, tools, and timelines is where many organizations stall. That's where S3 Security's Vulnerability Management Center (VMC) Services come in. Our consultants provide expert coordination and practical guidance to help you close gaps efficiently and confidently.

Our experienced consultants work alongside your team to interpret findings, manage remediation plans, and track measurable progress. We coordinate timelines, support documentation, so that issues are resolved with accountability and clarity.

Whether you're facing tight deadlines, limited staff, or mounting remediation backlogs, our VMC Services bring clarity and momentum to your program. We help you close vulnerabilities with structure, focus, and measurable progress.

EXPERTISE YOU CAN TRUST

With over 25 years of cybersecurity experience, S3 Security has helped organizations across industries translate testing data into meaningful security improvements. Our VMC Services are led by seasoned consultants with deep offensive security experience, ensuring that remediation efforts are informed, prioritized, and aligned with your real-world risk.

TAILORED TO YOUR BUSINESS

Every organization faces unique challenges when managing vulnerabilities. Whether you're juggling resource constraints, coordinating efforts across departments, or preparing for a re-test, we adapt our approach to fit your needs. We help define remediation plans, support internal communication, and provide visibility into status and risk so your team can stay focused on what matters.

BRIDGING STRATEGY & EXECUTION

VMC Services go beyond standard consulting. We provide hands-on coordination for follow-up, evidence collection, risk validation, and progress tracking. We help ensure your remediation efforts stay on track and support your audit or retesting process. By aligning technical detail with organizational goals, we help your team close gaps with confidence and strengthen your overall security posture.

We turn scan and test results into measurable outcomes that help your team close gaps, reduce risk, and strengthen your cybersecurity program.

WHY LEADING TEAMS CHOOSE VMC SERVICES

Expert Support to Fill Gaps, Reduce Risk, and Keep Remediation on Track

Security teams are stretched thin, balancing limited bandwidth, growing vulnerability data, and the pressure to act quickly. Many lack the time or resources to coordinate remediation across departments or retain talent with the right expertise. S3 Security's Vulnerability Management Center (VMC) Services provide the hands-on support needed to reduce risk, close gaps, and keep remediation on track.

Too Many Findings. Not Enough Resources.

Whether sourced from vulnerability scans or penetration tests, results often uncover more issues than internal teams can realistically manage. Staff limitations, tight timelines, and remediation complexity can create the perfect storm.

S3 Security acts as an extension of your team. We help prioritize findings, manage remediation efforts, and reduce the strain on internal staff. Our structured approach helps you gain momentum and make measurable progress.

Built for Real-World Risk and Operational Demands

We help you focus on the issues that matter most by identifying the risks that pose the greatest threat to your operations, data, and reputation.

Our analysts work closely with your internal stakeholders to coordinate efforts, support accountability, and prepare documentation for leadership, auditors, or retesting. From technical findings to strategic decision-making, we provide the guidance you need to stay ahead.

Business Impact You Can Measure

VMC Services help you:

- Reduce delays and missed remediation deadlines
- Minimize risk exposure from unresolved findings
- Bridge internal talent gaps with experienced support
- Improve communication across IT, compliance, and leadership
- Prepare clear, defensible documentation for decision-makers
- Maintain momentum across complex, multi-team environments

We help you resolve vulnerabilities with precision, urgency, and executive-level confidence.

FROM SCAN TO RESOLUTION

Our analysts do more than advise. They work directly with your team to drive remediation, reporting, and measurable progress. Each engagement is tailored to your environment but follows a structured, results-driven approach that reduces risk and improves accountability.

VMC Services provide support from initial findings through validation and resolution, helping your team turn raw data into real progress.

What VMC Services Include:

Services are customized based on your priorities, staffing model, and program goals, ensuring the right level of support at every step.

- Scan remediation coordination
- Pen test remediation & follow-up
- False positive validation
- Retest preparation & issue tracking
- Vulnerability review & prioritization
- Reporting support for leadership
- Metrics & progress tracking
- Risk & access role reviews
- Stakeholder coordination & communication
- Training & compliance tracking

We connect the dots across findings, fixes, and reporting so your team can stay focused and ready to show measurable progress.

WHY CLIENTS CHOOSE VMC SERVICES

Organizations choose S3 Security's VMC Services to reduce risk, ease remediation burdens, and keep security initiatives on track without overwhelming internal teams.

With VMC Services, you can

- Close vulnerabilities faster and with greater accuracy
- Offload coordination while maintaining visibility
- Prioritize based on real risk, not just volume
- Improve readiness with organized evidence and clear ownership
- Reduce pressure on internal teams and bridge resource gaps
- Maintain momentum and avoid remediation backlogs

WHAT MAKES S3 SECURITY DIFFERENT:

Real-World Experience: Work with consultants who have decades of hands-on expertise guiding vulnerability remediation across high-risk industries.

End-to-End Support: From initial triage to issue tracking and validation, we manage the details so your team can focus on execution and results.

Tailored Engagements: Each engagement is customized to your systems, staffing model, and business priorities.

Proven Results: We have supported clients across diverse, multi-entity environments for more than 25 years. Our work helps teams move from findings to resolution with clarity and confidence.

VMC Services don't just organize your findings. They turn insights into action and help strengthen your entire security program

YOUR CYBERSECURITY PARTNER

S|3 SPECIALIZED SECURITY SERVICES

FLOAT ON

Cybersecurity and compliance to ward off any threat.

Wherever You Are in Your Cybersecurity Journey, We're With You

At S3 Security, we meet you where you are. Whether you are responding to your first vulnerability scan, managing findings from a recent penetration test, or trying to reduce backlog across internal teams, we understand the pressure of deadlines, risk exposure, and operational demands.

Our mission is to help you stay proactive and audit-ready without overwhelming your team. We align remediation support with your business goals to reduce risk, improve visibility, and keep progress moving.

With decades of experience supporting clients across regulated, high-risk industries, we serve as a trusted partner. We help manage remediation with structure and accountability, laying the foundation for stronger defenses, better decisions, and lasting program maturity.
